

Introducing GIGTRAK+™

Vital intelligence for the gigabit economy.

Test Elon Musk's Starlink is raining Internet connections down from the sky. Starry and T-Mobile are pushing to make fixed wireless a killer app. Verizon's 5G Home may pose an existential threat to fixed wireline providers. And almost weekly we learn of new entrants that are building or expanding gigabit-ready fiber optic networks.

Make no mistake: The telecom world is changing fast, with determined newcomers rising to challenge incumbents as the nation makes the leap to gigabit connectivity.

For companies that have made the Gig economy the centerpiece of their business models, keeping track of the who, what, how, and when of the networked economy is more vital than it's ever been.

But then, you already knew that.

What you may not understand is how to accomplish the task of gathering and maintaining critical market intelligence that supports smart business decision-making in a fast-changing, 24/7 market.

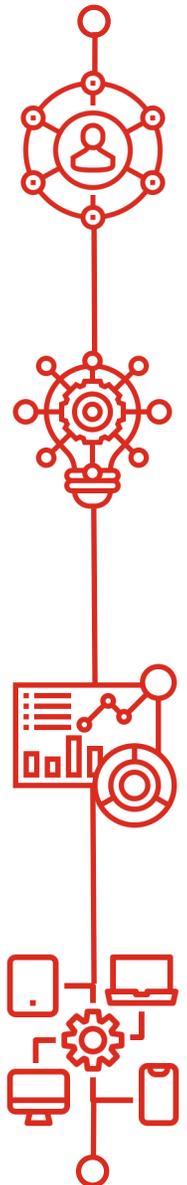

We're here to help.

GIGTRAK+™ is the new One Touch Intelligence solution that brings it all together: technologies, players, strategies, economics, and competitive threats. Drawing from our client-proven 5GTRAK® and ONETRAK® services, GIGTRAK+ combines provider profiles, news-and-analysis roundups, strategic insights, product details, and comparative metrics across multiple technology platforms.

Whether you're scouting a new-to-market competitor or in need of an instant download about 5G, GIGTRAK+ puts the intelligence you need right at your fingertips:

- **Timely dossiers of your top competitors.** From regional newcomers to the largest U.S. telecoms, GIGTRAK+ assembles and presents current, detailed intelligence about the competitors you need to follow. Information and detail that would require days to gather and assess is at your fingertips in an instant.
- **Market monitoring from experienced experts.** From quarterly investment calls to metrics buried deep in 10-Qs to current advertising and messaging, GIGTRAK+ surfaces the vital information you need to know – but don't have the time to uncover.
- **Unique, insightful reporting.** Our team of experts from the telecom, advertising, data analytics, and journalism disciplines present original, informed, forward-thinking analysis and interpretations of where the market is going. It's like having your own strategic planning team at your command, every day.
- **Metrics, KPIs and comparative datasets.** Pricing, promotional offers, subscriber counts, and geographic indicators are displayed in an easy-to-access, always-on, secure portal that delivers the information you want, exactly when you want it.
- **Products and presentation.** GIGTRAK+ gives you direct visual insight on what your top competitors offer, how they display their services, what the fine print says, and how the consumer experience unfolds. It's a front-row view of the entire competitive marketplace.
- **Comprehensive awareness.** GIGTRAK+ pays attention to every important delivery technology in the market: from 5G mobile to fixed wireless to fiber optics to HFC. GIGTRAK+ watches over every meaningful platform and every meaningful provider, every day. So you don't have to.

TDS

Owner: Telephone & Data Systems Inc., Chicago. Subsidiaries include TDS Telecom, USCellular, Bend Broadband

Website: www.tdstelecom.com

Key markets: Wireline division: Madison, WI; Boise + Coeur d'Alene, ID; Spokane, WA

Cable division: Arizona, Colorado, New Mexico, North Carolina, Oregon, Utah, Texas

Primary Services/Positioning

- Internet:** "Get reliable, wireless high-speed Internet services at the best value...with speeds up to 1 Gig, everyone can stay connected to their online life on every device."
- Wi-Fi:** "Mesh technology allows you to extend your wireless network's range, delivering a strong, reliable Wi-Fi connection throughout your whole home."
- Device support:** "With TDS as your home Internet provider, you can access your own personal helpdesk to troubleshoot issues on all your Internet-connected devices." (Included in TDS Wi-Fi Security Pack below).
- Data storage:** "Safely store and protect important digital files: photos, video, music and more from up to 5 PCs."
